Education

Georgia Institute of Technology

Master of Science in Computer Science, Bachelor of Science in Computer Science, Minor in Mathematics

August 2023 – May 2028

Atlanta, Georgia

- **GPA: 4.0/4.0** | **Relevant Coursework:** Data Structures, Algorithms, Machine Learning, Computer Architecture, Databases, Networking, Computer Graphics, Probability/Statistics, Complexity Theory, Graph Theory, Real Analysis, Numerical Analysis

Experience

Cloudflare

Software Engineer Intern

September 2026 – December 2026

Austin, Texas

- Current Fall 2026 intern on the Cloudflare R2 Data Platform team.
- Implementing Apache Iceberg manifest file rewrite and data compaction for Cloudflare R2 with Rust and Tokio, increasing table maintenance efficiency and reducing R2 SQL query times.

Sony Interactive Entertainment

Software Engineer Intern

May 2026 – August 2026

San Diego, California

- Built a backend Spring Boot service to facilitate canary releases of new features and betas for the PlayStation platform.
- Implemented four asynchronous endpoints to process batch upload and deletion jobs for 100k+ users to a Cassandra database.
- Extensively tested endpoints with JUnit, Postman, and Cucumber, increasing repository-wide code coverage from 40% to 85% and catching two existing bugs in malformed request handling.
- Built a React and TypeScript frontend to manage beta releases through the backend API, replacing error-prone cURL workflow.
- Prototyped a boss fight detection system for PS5 Community Game Help with Qwen3-VL and Tesseract OCR; able to detect boss fights from gameplay footage of various games including Horizon and Elden Ring.

Georgia Institute of Technology

Teaching Assistant – CS 2200 Systems and Networks

December 2025 – May 2026

Atlanta, Georgia

- Led recitations for 50 students to teach fundamental systems concepts such as virtual memory, concurrency, networking, and C.
- Conducted office hours, developed autograders, and graded assignments, projects, and exams for 400+ students.

Travelers Insurance

Software Engineer Intern

June 2025 – September 2025

Hartford, Connecticut

- Implemented document ingestion microservices for insurance claims using Node.js, GraphQL, SQL, MongoDB, and TypeScript.
- Deployed containerized and serverless services to AWS (EKS, Lambda, RDS) using Docker, Terraform, and Kubernetes.
- Authored 30+ unit, integration, and end-to-end tests using Jest, Supertest, and Postman, raising code coverage to 90%.
- Placed second in intern hackathon and first in LeetCode-style coding competition out of 100+ interns.

Projects

Combat Enchantments | Java

curseforge.com/minecraft/mc-mods/combat-enchantments

- Designed, developed, and maintained a Minecraft mod, adding 30+ new weapon and armor enchantments to the game.
- Carefully fine-tuned and balanced enchantments through testing and player feedback, creating unique builds and archetypes.
- Reached 300K+ cumulative downloads across multiple platforms and featured in several YouTube videos and popular modpacks.

How the Turntables | Godot, GDScript, C#, GLSL

dsfhdsbjtsb.itch.io/howtheturntables

- Created a unique rhythm game using Godot, GDScript, C#, and GLSL for the one-week-long Juniper Dev Game Jam.
- Designed and implemented core gameplay loop; lead a team of 9 developers, artists, and musicians to craft a cohesive game.
- Received the 4th highest number of ratings through community vote, placing 1st in audio and 12th overall out of over 3.5k games.

Dungeon Deja Vu | Rust, Bevy, Rapier, Aseprite

dsfhdsbjtsb.itch.io/dungeon-deja-vu

- Designed and implemented a puzzle platformer for Bevy Game Jam 5, placing 8th overall and 3rd in game design out of 77 games.
- Implemented core gameplay mechanics using Rust and the Bevy Game Engine; drew all sprites and animations using Aseprite.

Raytracer | C++

github.com/dsfhdshdjtsb/raytracer

- Developed a high-performance, dependency-free Whitted ray tracer in C++, generating offline renders of complex scenes.
- Implemented Blinn-Phong shading, recursive reflection, refraction, and OBJ model loading.

Technical Skills

Languages: C++, C#, Java, GDScript, Python, Rust, SQL, GLSL

Game Dev: Godot, Unity, Bevy, Aseprite

Technologies: Git, Linux, AWS, Docker

Certifications: AWS Certified Solutions Architect – Associate

Interests: Ranked Masters in League of Legends, top laner for the GT Esports League of Legends team
