Education

Georgia Institute of Technology • (GPA: 4.0/4.0)

Bachelor of Science in Computer Science

Bachelor of Science in Mathematics

Expected December 2027

Atlanta, Georgia

- **Relevant Coursework:** Systems and Networks, Computer Architecture, Algorithms, Data Structures, Machine Learning, Deep Learning, Numerical Analysis, Probability/Statistics, Databases, Computer Graphics, Graph Theory, Analysis, Linear Algebra

Experience

Cloudflare

Software Engineer Intern

September 2026 – December 2026

Austin, Texas

- Incoming Software Engineer Intern for Fall 2026 on the R2 Data Catalog team
- Will be using Rust, Go, and Apache Iceberg to improve R2 query performance.

Sony Interactive Entertainment (PlayStation)

Software Engineer Intern

May 2026 – August 2026

San Diego, California

- Created a boss-fight detection system with Qwen-VL and Tesseract OCR, allowing for automatic tagging of boss fight clips for PS5 Community Game Help.
- Implemented backend Java Spring server to facilitate canary releases of new features and betas for the PlayStation platform.
- Added 4 new endpoints with asynchronous Java code to handle batch upload and delete jobs for hundreds of thousands of users.
- Developed a React frontend to allow internal teams to manage releases; implemented with TypeScript, React, and Vite.

Georgia Institute of Technology

CS 2200 Systems and Networks - Teaching Assistant

December 2025 – May 2026

Atlanta, Georgia

- Held recitations for 50 students to teach fundamental systems concepts such as virtual memory, concurrency, networking, and C.
- Conducted office hours, developed autograders, and graded assignments, projects, and exams for 400+ students.

Travelers Insurance

Software Engineer Intern

June 2025 – September 2025

Hartford, Connecticut

- Implemented document ingestion microservices for insurance claims using Node.js, GraphQL, SQL, MongoDB, and TypeScript.
- Supported containerized and serverless deployments on AWS (EKS, Lambda, RDS) with Docker, Terraform, and Kubernetes.
- Authored 30+ unit, integration, and end-to-end tests using Jest, Supertest, and Postman, raising code coverage to 90%.

Projects

How the Turntables | Godot, GDScript, C#, GLSL

dsfhdshdjtbsb.itch.io/howtheturntables

- Designed and implemented a unique rhythm game using Godot, C#, and GLSL for the one week long Juniper Dev Game Jam.
- Managed a team of 9 developers, artists, and musicians to craft a cohesive game with 5 original songs and 12 unique levels.
- Received the 4th most ratings through community vote, placing 1st in audio and 12th overall out of over 3.5k games.

Combat Enchantments | Java

curseforge.com/minecraft/mc-mods/combat-enchantments

- Designed, developed, and maintained a Minecraft mod, adding 30+ new weapon and armor enchantments to the game.
- Carefully fine-tuned and balanced enchantments through testing and player feedback, creating unique builds and archetypes.
- 300k+ cumulative downloads across multiple platforms; featured in several YouTube videos and popular Modpacks.

Dungeon Deja Vu | Rust, Bevy, Rapier, Aseprite

dsfhdshdjtbsb.itch.io/dungeon-deja-vu

- Created a cyclical puzzle platformer video game for Bevy Game Jam 5, placing 8th overall and 3rd in game design out of 77 games.
- Implemented core gameplay mechanics using Rust and the Bevy Game Engine; drew all sprites and animations using Aseprite.

Raytracer | C++

github.com/dsfhdshdjtbsb/raytracer

- Developing a high-performance raytracer in C++, generating offline renders of complex scenes.
- Implementing rendering techniques such as path tracing, global illumination, and physically based rendering.

Technical Skills

Game Development: Godot, Raylib, Unity, Bevy, Aseprite, Blender

Certifications: AWS Certified Solutions Architect - Associate (SAA-C03)

Languages: Python, Rust, C++, C#, C, Java, JavaScript, TypeScript, HTML/CSS, SQL, GLSL

Technologies: Git, Linux, Docker, SQL, MongoDB, Firebase, AWS, Spring, React, Node.js, GraphQL, Express, PyTorch, NumPy, Jest, JUnit

Miscellaneous: Masters in League of Legends, Top Laner for the GT Esports League of Legends team
